🚀 Quenito VPS Quick Start Guide

📋 Reality Check

- **Current automation:** ~70% (demographics, simple questions)

- **Manual needed:** ~30% (complex questions, brand selections)

- **Time per survey:** 5-15 minutes WITH your interaction

- **Goal:** Keep building patterns while in Fiji!

🎯 How This Works

1. **Survey Checker** runs 24/7 and notifies when surveys available

2. **You connect via VNC** when ready to run surveys

3. **Quenito automates** what it can (~70%)

4. **You handle** the manual parts (~30%)

5. **Patterns keep building** for future automation

⚡ Quick Setup (15 minutes)

1. Deploy to VPS

```bash
# On your local machine
./deploy_to_vps.sh
```

2. SSH to VPS and Configure

```bash
ssh root@YOUR_VPS_IP
cd /opt/quenito

# Add OpenAI key
echo "OPENAI_API_KEY=sk-your-key-here" > .env

# Build and start
docker-compose up -d
```

3. First-Time Login

```bash
# Open VNC in browser
http://YOUR_VPS_IP:6080

# Setup login
docker exec -it quenito-automation python quenito_headless.py --mode login
# Login manually in VNC browser
```

🎮 Daily Workflow

Morning Check (2 min)

```bash
# From your phone/laptop
./remote_control.sh
# Choose option 1 (Check surveys)
```

Run Surveys (5-15 min each)

When surveys are available:

1. **Open VNC:** `http://YOUR_VPS_IP:6080`

2. **Start session:**

   ```bash
   ./remote_control.sh
   # Choose option 2 (Interactive session)
   ```

3. **In VNC browser:**
   - Watch Quenito handle demographics ✅
   - Answer manual questions when prompted
   - Click Next after manual answers
   - Watch automation rate climb!

Evening Review (2 min)

```bash
./remote_control.sh
# Choose option 3 (View report)
```

📊 What to Expect

Week 1 from VPS:

- Run 3-5 surveys daily

- Build 100+ new patterns

- Reach 75% automation

- Earn $10-15/day

- Knowledge base grows!

When Back in Australia:

- 80%+ automation rate

- Faster completion

- Add more platforms

- Scale to multiple personas

🛠️ Troubleshooting

Can't see browser in VNC?

```bash
docker exec quenito-automation supervisorctl restart xvfb x11vnc
```

Survey page won't load?

- MyOpinions works from AU IPs only

- Check VPS is Sydney-based

- Clear cookies and re-login

Automation not working?

- Knowledge base needs more patterns

- Keep doing manual surveys to teach

- Check logs for errors

💡 Pro Tips

1. **Best times:** 8-10am, 2-4pm, 6-9pm Sydney time

2. **Use phone:** SSH apps work great for remote_control.sh

3. **Multiple tabs:** VNC on laptop, SSH on phone

4. **Save patterns:** Every manual answer teaches Quenito

5. **Be patient:** Automation improves with each survey

📱 Mobile Setup (iOS/Android)

1. Install SSH client (Termius/JuiceSSH)

2. Save VPS connection

3. Run commands directly

4. VNC works in mobile browser too!

🎯 Success Metrics

Day	Surveys	Automation	Earnings
1	3	70%	$6
2	4	72%	$8
3	5	75%	$10
7	5	80%	$12

🚀 Next Level (After Week 1)

- Add YouGov when back in AU

- Deploy second persona (Quenita)

- Add residential proxy

- Scale to 5 platforms

- Reach $50/day target

Quick Commands Cheat Sheet

```bash

```

```
# Check surveys
ssh root@VPS_IP "docker logs --tail 20 quenito-automation"

# Start interactive session
ssh root@VPS_IP "docker exec -d quenito-automation python quenito_learning_with_automation.py"

# View VNC
http://YOUR_VPS_IP:6080

# Check status
ssh root@VPS_IP "docker ps"

# Restart
ssh root@VPS_IP "cd /opt/quenito && docker-compose restart"
```

Remember: Every manual answer = future automation! 🧠💪
